

BizFed's Three Pronged Approach

Define, Strengthen and Mobilize People Around a Cutting Edge Agenda To Create Jobs for a Better Future

BizFed works every innovative angle to change business as usual in California. We all want a strong economy, good jobs, and a healthy environment. Through our massive network of networks, bringing disparate voices together to agree on facts, and by building a pipeline of elected officials that understand what is at stake, BizFed is shaping the future of California.

Strengthening the Voice of Business

As a massive grassroots network of business networks, BizFed unites top business associations with premier companies, public agencies and educational institutions across the nation's largest county. BizFed educates, engages and mobilizes business, aligning both large and small in a powerful voice advancing a shared agenda for economic vitality. For more information, visit www.bizfed.org.

Defining the Voice of Business

The BizFed Institute, a sponsored project of Community Partners, is the educational and research arm of BizFed. Bringing together diverse civically minded business, academic, labor and environmental leaders, the Institute looks for common ground and hard facts to help solve some of the most pressing issues facing California communities. For more information, visit www.bizfedinstitute.org.

Mobilizing the Voice of Business

BizFed's Political Action Committee is the only PAC that directs their resources and contributions in all 88 municipal elections in LA County and at the County level. As a PAC of business-focused PACs, we have had unprecedented success electing public officials focused on building a business-friendly region. For more information, visit www.bizfedpac.org.
